SUMMARY

Financial Analyst with 4+ years of experience across FP&A, financial reporting, budgeting, forecasting, financial modeling, and investment analysis within financial services and technology environments. Skilled in Advanced Excel, SQL, Power BI, Anaplan, Alteryx, SAP S/4HANA, SAP Central Finance, and SAP Group Reporting, with experience analyzing P&L, Balance Sheet, Cash Flow, OPEX, CAPEX, working capital, revenue, and profitability. Experienced in driver-based planning, annual budgeting, quarterly reforecasting, variance analysis, scenario modeling, management reporting, and investment evaluation, translating financial and operational data into planning and business insights.

EDUCATION

Master of Science in Computer Science **Memphis, Tennessee**
University of Memphis

SKILLS

Financial Planning & Analysis: FP&A, Budgeting, Annual Operating Planning, Forecasting, Variance Analysis, P&L Analysis, Financial Modeling, OPEX, CAPEX, Scenario & Sensitivity Analysis, Cost & Profitability Analysis
Financial Reporting & Accounting: P&L, Balance Sheet, Cash Flow, GL Reporting, Management Reporting, Consolidation, Month-End Close, Reconciliation, Budget-to-Actual Analysis
Financial Systems & ERP: SAP S/4HANA, SAP Central Finance, SAP Group Reporting, Anaplan
Data & Business Intelligence: SQL, Advanced Excel, Power BI, Power Query, Alteryx, KPI Dashboards, Reporting Automation
Investment & Valuation: NPV, IRR, ROI, Payback Analysis, Capital Budgeting, Investment Analysis
Treasury & Working Capital: Cash Flow Analysis, Working Capital Analysis, Liquidity Analysis, Treasury Planning
Stakeholder & Business Partnership: Executive Reporting, Financial KPI Reporting, Cost Optimization, Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Goldman Sachs **Mar 2024 – Present | United States**
Financial Analyst

- Analyzed payment-product performance across ACH, Fedwire, RTP, and digital payment channels by evaluating transaction volumes, pricing, fee income, processing costs, and client activity, identifying key revenue and contribution-margin drivers across \$50M+ in payment activity.
- Reconciled transaction, revenue, expense, and general-ledger data across finance and operational sources using SQL, Excel, and Alteryx, resolving discrepancies and strengthening the accuracy of monthly management reporting and profitability analysis.
- Developed driver-based FP&A and budgeting models in Anaplan and Advanced Excel, linking transaction volumes, pricing, vendor costs, and OPEX to annual budgets and quarterly reforecasts, improving visibility into spending and forecast requirements across \$12M+ in annual operating expenses.
- Modeled base, upside, and downside scenarios for payment volumes, pricing changes, client adoption, processing costs, and liquidity activity, quantifying revenue and margin impacts to support planning, pricing decisions, and strategic business cases.
- Evaluated product economics and investment opportunities through ROI, NPV, IRR, payback, contribution-margin, and sensitivity analysis, assessing technology, payment-rail, and treasury initiatives against projected revenue growth, operating costs, and implementation requirements.
- Automated recurring Power BI performance reporting by integrating transaction volumes, revenue, expenses, pricing, and forecast data into KPI dashboards, reducing manual reporting effort by 30% and improving visibility into actual-versus-budget and actual-versus-forecast performance.
- Assessed technology and infrastructure CAPEX requirements for Transaction Banking initiatives, developing investment cases that compared upfront capital needs, depreciation impacts, expected cost savings, and business benefits to support capital-allocation decisions.

State Street **May 2020 – Aug 2022 | India**
Financial Analyst

- Managed monthly financial reporting and consolidation across 20+ legal entities, analyzing P&L, Balance Sheet, GL, revenue, operating expenses, and intercompany activity in SAP S/4HANA to explain entity-level performance and support accurate month-end close and management reporting.
- Validated 100K+ financial records across source ERP systems and SAP Central Finance, investigating differences in revenue, expenses, intercompany balances, and account classifications to strengthen the accuracy and completeness of consolidated financial reporting.
- Mapped chart-of-accounts, cost centers, profit centers, and reporting hierarchies during the SAP Central Finance transformation, aligning financial data structures across entities and enabling consistent management and statutory reporting.
- Developed financial models to analyze month-end P&L, Balance Sheet, and working-capital movements, identifying accrual and intercompany variances, explaining budget-to-actual changes, and supporting timely close and management reporting.
- Created management reporting and financial-performance dashboards using Advanced Excel, SQL, Power BI, and Power Query, translating accounting data into views of revenue, expenses, working capital, and entity-level performance.
- Streamlined recurring reconciliation and financial-validation procedures using SQL and Power Query, reducing manual review effort and shortening reporting turnaround by approximately 2 business days across recurring close activities.
- Partnered with Accounting, Controllershship, Finance, and technology teams to resolve reporting issues and strengthen SAP Group Reporting, consolidation, financial controls, and data-quality processes, improving the reliability of downstream financial reporting.
- Monitored cash-flow and working-capital performance across receivables, payables, and intercompany balances, identifying timing-driven liquidity requirements across \$4M+ in working-capital activity to support short-term cash planning and treasury decisions.

PROJECTS

Financial Planning, Forecasting & Variance Analysis

- Developed an FP&A model using historical revenue, operating expenses, headcount, and departmental spending data to build monthly budgets, rolling forecasts, and scenario analyses for financial planning.
- Analyzed actuals against budget and forecast using variance analysis and Power BI dashboards, identifying key spending drivers and translating financial trends into actionable insights for management planning and cost-control decisions.

Corporate OPEX Budgeting & Forecasting

- Compared historical departmental expenses across payroll, technology, facilities, travel, and vendor costs to identify spending patterns and establish budget drivers for annual financial planning.
- Engineered an Advanced Excel financial model linking headcount, vendor contracts, planned spending, and historical expense trends to develop annual OPEX budgets and monthly forecasts.
